

Climate Change Mitigation Programs

Supported By:

The combined entity of GEF/UNDP SGP CEE and Ministry of Forest, Environment and Climate Change, have supported We Care Society in implementing various climate change mitigation program. Under this umbrella we have undertaken Household Biogas, Compost pits and Smokeless Chullah programs, as all these will be complementary to each other's in a long run.

As part of the program, we have implemented Compost Production and Bio Gas project for United Nations Development programme which brought direct benefits to more than 200 farmers in self-production of compost and direct utilization of bio gas resulting in substantial saving for the poor farmers.

Under the support from GEF/UNDP SGP CEE and Govt. of India, Ministry of Forest, Environment and Climate Change, WCS has initiated various Climate Change Mitigation programs starting with Smokeless Chullahs Program, which will result in reduction of CO2 equivalent emissions to a large extent.

For this WCS is working with more than 15 NGOs from various states such as Karnataka, AP, Telangana, TN, Maharashtra, MP, Odisha, Chattisgarh and Jharkhand, where in the technicians and trainers are training these NGOs on installations, maintenance and proper use of the Smokeless Chullahs.

Also WCS in association with local organization, helped United Nations in implementing solar energy program benefitting 200 households, public places including hospitals, schools etc. in five different rural communities in the Afram Plains district of Ghana, Africa.
