## WCS Health Care Initiatives

Keeping our long-term goal in sight, we have initiated various projects in Agriculture, Environment and Renewable energy sectors in these project areas.

After achieving significant milestones in these sectors, now WCS would like to address the health issues faced by the community members, viz, Farmers, Women and Children, who are suffering from water borne diseases, malnutrition, respiratory diseases, diabetes, cancer, pregnancy related issues etc.

Few of our programs are as follows:

S. No.	Initiatives	Health Impacts
1	Cancer Awareness, Screening And Vaccination for Urban & Rural Women of India	Increases awareness about Cervical and Breast Cancer. Also early detection reduces onset of cancer and facilitates easy control at a later stage.
2	Stop Diabetes Program	Facilitates early detection of diabetes Increases awareness about Diabetes and its effects on one's daily life Reduces complication and facilitates easy control also
3	Addressing Malnutrition among Children and Women	Increases immunity and overall health aspects for poor women and children
4	Remote monitoring of Fetus	Helps in the management of high risk pregnancies by enabling remote assessment of fetal and maternal well-being by the doctors
5	Early detection of Diabetic Retinopathy	Early detection of Diabetic Retinopathy reduces most of the complications associated with it, later in their life
6	Providing Safe Drinking Water (RO Technology)	Reduces Water Borne diseases
7	Providing Improved Chullhas	Avoids Respiratory diseases, besides reducing the surrounding environmental pollution
